

Changes to original Assignment A4

Shreysa Sharma

11/9/2017

Assignment A4 was done as part of assignment A8. Below are the changes I made to the assignment:

A4	A8
The initial code had 3 Map and 2 reduce jobs and 1 reduce job	There is just 1 Map reduce job

The 1st mapper and reducer would just do the cleaning part | The Mapper cleans and and maps the airport and airlines data

The 2nd map job maps mean delay data for airlines | The reducer calculates the mean delay for each The 3rd map job maps mean delay data for airports | The output is merged file with mean delays for airport & airlines airlines The 2nd reduce job generates the actual mean delay and dump it into| 2 seperate files (1 for airline and 1 for airport) |
